DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 4-6, 8-14 and 16-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Donohue et al., US Patent No. 6,312,319.

Donohue et al. discloses all the limitations of claims 1, 12, 19 and 27, i.e., a fixed abrasive pad (310), a web dressing media (590) having a contact surface defined between a first point and a second point (edges of the web), a feed roller, a take up roller (not shown, col. 17, line 30-45); a pressure application plate (589) applied to a surface opposite the contact surface.

Regarding claims 9 and 20, embodiment shown in Fig. 18 depicts a housing (593).

Regarding lowering and contacting the surface, Donohue et al. meets the limitations, e.g., liner actuator (681) in embodiment of Fig. 22.

Art Unit: 3723

Allowable Subject Matter

3. Claims 25 and 26 are allowed.
4. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 12/27/02 have been fully considered but they are not persuasive.

In response to applicant's argument that Donohue does not disclose all the limitations, because the polishing pad is not partially stabilized, it is noted that rollers 325 and 330 are supporting the pad and thus meeting the limitation of "at least partially stabilized in position when the web dressing medial is being applied". Further the "pressure application" in Donohue, (589) is applied to an "application surface" opposite to a "contact surface".

Conclusion

6. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Hadi Shakeri at (703) 308-6279, FAX (703) 746-3279 for unofficial documents.
